The ages noted for each Pyr were calculated at the time that the application was received. The Health Committee would like to thank the owners for letting us know about these very special Pyrs and for submitting health information for each of them to the our tabulator.

Another slow year for participation in this program. The good news is that these dogs were doing well at advanced ages. I know that there are many other Pyrs with long lives. I hope to be able to recognize them and their owners and breeders in 2016.
